24(c) Supplemental Label

RESTRICTED USE PESTICIDE

For retail sale to and use only by Certified Applicators or persons directly under their supervision and only for those uses covered by the Certified Applicators certification

FOR USE AND DISTRIBUTION IN THE STATE OF MONTANA ONLY

DIRECTIONS FOR USE:

It is a violation of federal and state law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

Crop/Site:	Seed Potatoes
Target Pest:	Aphids, Colorado Potato Beetles, Leafhoppers, Nematodes
Rate:	14 to 20 pounds TEMIK® 15G per acre. 14.5 to 21 ounces per 1000 feet of row.
Application Timing:	At planting or just prior to planting
Method of Application:	Apply granules with the seed pieces in the planting furrow and cover with soil OR apply granules in a 6-inch band and work into the soil or cover with soil into a depth of 4 inches. Plant seed into treated zone.

USE LIMITATIONS

- All applications must be made with **Positive Displacement Applicators** such as Horstine Microband® or Gandy PDM®.
- Do not apply after planting.
- Do not make more than one application per crop. If replanting is necessary, do not retreat the second crop with TEMIK®.
- Do not exceed 20 pounds of TEMIK® brand 15G Aldicarb Pesticide per acre.
- Do not use furrow irrigation.

RESTRICTIONS

- No portion of the seed plant may be used or distributed for food or feed.
- Do not harvest treated seed potatoes within 120 days of an application
- Treated seed potatoes may not be distributed for human consumption or animal feed if harvested prior to 150 days after application.
- Do not allow livestock to graze on treated seed potatoes.
- Growers must sign and agree to the conditions set forth in the Non-Food Crop Status Agreement from the Montana Department of Agriculture prior to purchase and application.
